

# ENGINEERING CONSULTANCY SOLUTIONS.

## OUR ENGINEERING CONSULTANCY SOLUTIONS.

Optera has extensive in-house engineering knowledge that offers our clients a consultancy solution on the more complex scenarios. We provide expert advice to determine cause, design investigations, assist with cost engineering, and assess potential solutions. We can also provide synergy during project fulfilment by working with Optera on-site construction teams to create efficient and flexible solutions.

## HOW CAN IT HELP YOU.

Optera's consultancy arm creates the advantage of ensuring that the most efficient solution is considered, in terms of logistical restrictions, ground conditions, and cost effectiveness. We also focus on carbon-reduction schemes as part of our environmental impact commitments. This in-house expertise through all stages of a project ensures the optimum solution is selected, and eliminates unnecessary delays and variations.

## THE BENEFITS.

- In-house engineering expertise providing an extensive range of civil engineering, stabilisation, and ground modelling solutions.
- Ability to create solutions that are both cost-effective and environmentally responsible, reducing carbon emissions.
- Providing innovation and flexibility to minimise cost and disruption for clients and customers.

## OUR EXPERIENCE.

OPTERA PROVIDE GENUINE CONSULTANCY EXPERTISE FROM INVESTIGATION AND DESIGN, TO FULFILMENT AND REGULATORY COMPLIANCE.
