

STRUCTURAL REPAIR SCHEMES

OUR STRUCTURAL REPAIR SCHEME SOLUTIONS.

Optera are able to offer a full spectrum of structural repair. This ranges from robust masonry reinforcement to lateral restraint and other tie-related issues. Our in-house team are able to design temporary works, ranging from needle design and temporary support, following impact claims or other catastrophic loss claims, to the design and implementation of raking shore schemes, where properties are affected by a loss of foundation support and geometric distortions. Our solutions transcend perils and Optera is routinely engaged in fire, flood, storm as well as foundation-related issues.

HOW CAN IT HELP YOU.

- Optera's turnkey offering is able to react in emergency response scenarios.
- Our in-house design solution offers a one-stop approach, able to react as the issues evolve.
- The design and build offering saves time and cost on design and tendered solutions which add months to claim duration.

THE BENEFITS.

- Innovative designs save time and cost.
- Approved design and installer of masonry reinforcement.
- Our structural design team are not tied to one system.
- Our installation team are able to refer to the design team, reducing delays when the works evolve.
- Design and build (D&B) reduces tendering costs.
- D&B is quicker to site, reducing AA and other ancillary claims costs.

OUR EXPERIENCE.

OPTERA OFFERS GENUINE EXPERTISE IN DESIGN AND IMPLEMENTATION OF STRUCTURAL REPAIR SCHEMES, PROVIDING BESPOKE SOLUTIONS TO ENSURE THE OPTIMUM AND MOST EFFICIENT RESULTS.
